
PROGRAMME	
-----------	--

- | | |
|-------------|---|
| 8h30 | Accueil des participants
Mise en place des communications affichées |
| 9h00 | Allocutions d'accueil |
| 9h30-10h30 | Conférence plénière
Professeur Francis BARIN
<i>Université de Tours (UMR Inserm U 966 ; CNR du VIH)</i>
Variabilité génétique du VIH : impact sur la neutralisation antivirale et conséquences sur l'élaboration d'un vaccin |
| 10h30-11h15 | 1^{ère} session de posters avec pause-café |
| 11h15-12h45 | Communications orales |
| O1 | Romain Hardet (<i>Inserm U905, IRIB</i>)
Oral tolerance improves transgene persistence in gene therapy setting, |
| O2 | Elodie Mathieu-Rivet (<i>EA4358, IRIB</i>)
Deciphering microalgae glycobiology: <i>Chlamydomonas reinhardtii</i> and <i>Phaeodactylum tricornutum</i> as models to understand microalgae N-glycosylation pathways |
| O3 | Naouel Tennoune (<i>Inserm U1073, IRIB</i>)
Effects of commensal <i>Escherichia coli</i> bacteria on affinity of a-melanocyte-stimulating hormone-reactive immunoglobulins in male and female rats. |
| O4 | Tassadit Ouidir (<i>PBS, IRIB</i>)
Characterization of phosphoproteins involved in <i>Pseudomonas aeruginosa</i> PA14 adaptation |
| O5 | Ygal Benhamou (<i>Inserm U1096, IRIB</i>)
Role of Toll-like receptors 2 and 4 in mediating early vascular dysfunction and arterial remodeling in primary arterial antiphospholipid syndrome |
| O6 | Vadim Le Joncour (<i>Inserm U982, IRIB</i>)
Urotensin II receptor endogenous ligands as new candidates involved in high grade glioma tumor growth and neo-angiogenesis |
| 12h45-14h00 | Déjeuner |
| 14h00-15h00 | Conférence plénière
Professeur Jan MICHIELS
<i>University of Leuven Center of Microbial and Plant Genetics</i>
Bacterial persistence |

15h00-16h30 Communications orales

O7 Brahim Arkoun (*EA 4308, IRIB*)

In vitro maturation of fresh and frozen-thawed prepubertal mice testes

O8 Julien Bertrand (*Inserm U1073, IRIB*)

Evaluation of ubiquitinated proteins by proteomics reveals the role of the ubiquitin proteasome system in the regulation of Grp75 and Grp78 chaperone proteins during intestinal inflammation

O9 Marion Denorme (*Inserm U982, IRIB*)

Sunitinib and Sorafenib are promising anti-angiogenic molecules for the treatment of pheochromocytoma

O10 Orianne Henri (*Inserm U1096, IRIB*)

Structural-functional alterations of cardiac lymphatics in cardiovascular diseases

O11 Pauline Maby (*Inserm U1079, IRIB*)

Vers une stratégie d'immunothérapie cellulaire adoptive personnalisée dans les cancers colorectaux à instabilité microsatellitaire

O12 Baptiste Porte (*ERI 28, IRIB*)

An insight into the mice brain microvessels proteome: A focus on basal lamina protein content between 10 day-old and adult mice

16h30-17h15 2^{ème} session de posters avec pause-café

17h15-17h30 Remise des prix et clôture de la Journée
